Have your teams built up a stockpile of broken, obsolete, unused equipment across various locations and stores? Do you know the condition of what you have and whether it would be of any use? Is it part of an inventory and supported? Are you moving to a new location and need old equipment catalogued, removed, and securely disposed of or redeployed to your new location?

Unified-Support can make documented review, reuse and disposal happen. Conforming to the WEEE directive, we can offer secure and certified disposal. Service and Support is what we do, we thrive on detail, ensuring our clients get the very best lifespan, functionality and good use of their systems and technology assets – keeping what they need.

At Unified-Support we think differently, our ethos is to charge for support *as* you need it *when* you need it, *tailored* to your needs – you get enhanced support at a fraction of the traditional cost.

How does it work?

- Unified-Support collaborate with you to build an agreed output program in advance to ensure we meet your needs. We have the service and support expertise to review your options for re-use, decommission or disposal.
- Unified-Support dispatch a specialist team to your location when you need it and conduct a full audit and data analysis. Seeking and utilizing input from system components, integrators, manufacturers, client technology roadmap and associated teams. With an aim to capture existing and predicted future needs, clearly identifying what is possible and capturing any risk through a thorough understanding of our client.
- Utilization plans and project tracking methodology are built to our mutually agreed standards, putting forward applicable next steps based upon experience, tailored to our client's environment. We can help with change decisions to ensure your hardware is put to best use.
